SUMMARY

Full Stack Developer with 2 years of experience building robust, scalable web applications end to end. I began my career focused on backend engineering — server-side logic, database design, and API development — and over the past year grew into full stack, delivering complete products with React, Redux Toolkit, and modern JavaScript on the frontend. At Fonix Technologies I contributed to 6+ production projects, integrating cloud services, payments, and secure authentication. I'm passionate about clean architecture, performance, and shipping features that solve real business problems.

TECHNICAL SKILLS

Frontend	React.js, Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Responsive Design	**Backend**	Node.js, Express.js, Python, Laravel, REST APIs, JWT Auth
AI / LLM	LangChain, LangGraph, RAG, Vector Databases, LLM Integration, Chatbots	**Databases**	MySQL, MongoDB, Supabase, Pinecone / Vector DB
DevOps & Cloud	Docker, AWS (S3, EC2), Git, CI/CD	**Integrations**	Razorpay, Cloudinary, Twilio, Google OAuth

EXPERIENCE

Full Stack Developer — *Fonix Technologies* SEP 2024 – 2026

- Started in a backend role building and managing REST APIs with Node.js and Express.js; progressed to full stack, developing responsive React + Redux Toolkit frontends for production applications.
- Designed and maintained database solutions across MySQL, MongoDB, and Supabase, optimizing queries and API endpoints for faster response times.
- Integrated cloud and third-party services — AWS S3, Cloudinary, Twilio, Razorpay — and containerized applications with Docker for consistent deployments.
- Implemented secure authentication using JWT and Google OAuth with multi-role access control across projects.
- Delivered 6+ real-world projects end to end, collaborating on design, implementation, and deployment while improving problem-solving and code quality.

PROJECTS

AgapeCure — Hospital Management Platform *Node.js · Express · MongoDB · React*

- Built and maintained the full stack for a hospital management platform, from REST APIs to React-based dashboards.
- Implemented Google OAuth with multi-role access control for secure, role-based authentication.

- Integrated Razorpay for seamless payments and automated refunds; optimized endpoints for improved performance.
- Designed scalable handling and validation of large form data across patient and admin workflows.

Memarathi — Matrimony, Jobs & Community Portal

Laravel · MySQL · JavaScript

- Developed and maintained three integrated sub-sites (matrimony, jobs, community) with a shared architecture.
- Built profile creation, matching, and connection requests for matrimony; registration, applications, and resume submission for jobs.
- Delivered user profiles, groups, and event management for the community site, ensuring seamless cross-site integration.

SelfStorage — Community Engagement Platform

Node.js · Express · MongoDB

- Designed a backend with role-based access control to manage granular user permissions.
- Built features for users to create events, comment, and earn points for completing tasks.
- Enabled businesses to log in, showcase services, and engage the community through discussions and feedback.

DocuMind AI — RAG Knowledge Assistant

Python · LangChain · LangGraph · Vector DB · React

- Built an AI-powered assistant in Python that lets users chat with their own documents using a Retrieval-Augmented Generation (RAG) pipeline.
- Engineered document ingestion, embeddings, and semantic search over a vector database (Pinecone) for accurate, context-aware answers.
- Orchestrated multi-step LLM reasoning and tool calls with LangChain and LangGraph, and integrated the chatbot as a feature into a React frontend.
- Containerized the service with Docker and deployed on AWS for scalable, reliable inference.

EDUCATION

Master of Computer Applications (MCA) **2024 – Present**
Sri Balaji College of Engineering and Technology

Bachelor of Computer Applications (BCA) **2021 – 2024**
Sri Balaji College of Engineering and Technology

CERTIFICATIONS

Full Stack Web Development Bootcamp
Udemy — Online Certification
